What is BIFA?

The British International Freight Association (BIFA) is a trade association which represents UK companies engaged in the international movement of freight by all modes of transport: air, road, rail and sea.

A not-for-profit organisation, BIFA is funded by subscription and run by Members for Members, with a full-time Secretariat which administers the Association's affairs. BIFA provides an effective and proactive organisation dedicated to improving standards and professionalism in international trade.

Becoming an Associate Member of BIFA

Associate Membership is open to those companies, associations and other organisations which, whilst not themselves engaged in the provision of international freight services, have an ancillary interest in the industry and wish to develop their interests through the Association.

By becoming an Associate Member you can link your company to the pursuit of excellence and quality in the transport and logistics sector.
