## Introduction

The following Procedure Codes (PCs), Additional Procedure Codes (APCs), Additional Information (AI) Codes and Document Codes have been introduced in CDS 4.6.0 as part of preparation for the Windsor Framework. However, given the delay in the legislative go-live of the Windsor Framework these must not be used on CDS Declarations at present.

Traders must be ready for the Windsor Framework go-live by 31 March 2025, so may continue to use these codes in Trader Dress Rehearsal (TDR) and Trade Test (TT) to prepare. However, traders must not use these codes in CDS live environments. Use of these codes in live environments may result in rejections due to the validation included in CDS 4.6.0 and declarations that are accepted with their use will be investigated and remedial action may be taken as they are not legally compliant at present.

## Procedure Codes (DE 1/10)

Code	Description of Procedure
0024	

## Additional Procedure Codes (DE 1/11)

### A-Series

Code	Description of Procedure
A10	Destruction of Goods under Inward Processing using SPIMM and Non-SPIMM
